

DIC project (p1)

1. Instantiate one server s1, two whiteboards b1 and b2, and four clients.
 1. Use as many hosts as possible. For C+RPC, use at least two different CPU types, if possible.
 2. Click a few lines in each drawlines-window to show that the "original" functionality is still present.

(started server S1 at url //localhost/S1)

```
